

2018 ANNUAL MEETING– 11-12 OCTOBER

Building on the success of the HIPSO metrics

Makedonia Palace Hotel
Leof. Meg. Alexandrou 2, Thessaloniki 546 40, Greece

CONTEXT FOR THE MEETING

Based on the Whole Group’s feedback and discussions, we agreed that the use of HIPSO indicators among participating IFIs has helped to reduce reporting costs for clients, who previously endured an unintended burden from the IFI’s different reporting requirements, and they have served as platform for knowledge sharing among IFIs and for the development of other linkages, for example to the IRIS catalog.

We now have an opportunity to build on the success of the HIPSO indicators to serve as a foundation for a new agenda, given the new opportunities and challenges in the development landscape for HIPSO IFIs.

THE DAYS AT A GLANCE

- Please come between 8:30 and 9:00am, register, and settle in.
- We will start promptly at 9:00am.
- Come with an open mind and be ready for highly interactive sessions with plenty of discussion.

AGENDA
